Arkansas Department of Health Internship Program 2026

Description

The Arkansas Department of Health (ADH) Internship Program offers exceptional undergraduate and graduate students the opportunity to gain valuable real-world experience within the public health sector. As an intern, you will contribute to meaningful projects alongside dedicated professionals, gaining valuable insights into various areas of public health and potentially shaping the future of health in Arkansas. With diverse internship opportunities across departments, you can find a program that aligns with your interests and career aspirations.

Responsibilities

- Assist with diverse projects related to your chosen area of public health, such as epidemiology, community health promotion, environmental health, nutrition, health policy, and more.
- Conduct research and data analysis, contributing to initiatives aimed at improving the health and well-being of Arkansans.
- Participate in outreach and education campaigns, fostering awareness and promoting healthy behaviors within communities.
- Collaborate with diverse teams within the ADH, gaining exposure to various aspects of public health practice.
- Attend meetings, trainings, and professional development opportunities to enhance your knowledge and skills.

Qualifications

- Currently enrolled in an accredited undergraduate or graduate program in public health, related fields (e.g., biology, environmental science, nursing), or other relevant disciplines.
- Strong interest in public health and a desire to contribute to improving the health of Arkansans.
- Demonstrated commitment to community service and public health issues.
- Excellent communication, collaboration, and problem-solving skills.
- Ability to work independently and as part of a team in a fast-paced environment.
- Minimum GPA of 3.0 preferred for most programs.

Experience

- Previous volunteer or internship experience in public health or related fields preferred, but not required.
- Bilingual skills in English and Spanish a plus (depending on specific program).
- Familiarity with public health data analysis and research methods a plus.
